REACH Declaration

REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT
AND OF THE COUNCIL
of 18 December 2006
concerning the Registration, Evaluation, Authorisation and
Restriction of Chemicals (REACH)

Under the regulations Digitimer is a downstream user and producer of Articles. As such we are not required to register any of our products. Any substances used during the manufacture of Digitimer products are sourced from within the European Union and are used in volumes substantially below the 1 tonne per annum registration threshold.

Digitimer supports the objectives of the REACH regulation to improve the protection of human health and the environment from the risks posed by chemicals. We are, therefore, conscious of the Substances of Very High Concern (SVHC) and of the requirement to inform our customers if the concentration of SVHC in any of our products exceeds the >0.1% weight for weight threshold. We undertake to notify our customers if we receive information from our suppliers that the concentration of SVHC exceeds the regulatory thresholds or if substances that are added to the SVHC list in the future are above the threshold.

None of the preparations sold by Digitimer contain SVHC. All preparations supplied by Digitimer are sold under their original manufacturers' brands. We undertake to notify our customers if we receive information from our suppliers that the concentration of SVHC exceeds the regulatory thresholds or if substances that are added to the SVHC list in the future are above the threshold.

John Cooper
Technical Director
